Corporate Finance Institute (CFI), ALX

WORK EXPERIENCE

Data Analyst
February, 2023 – PRESENT
Upwork
- Developed analytical projects resulting in an impressive 200% increase in clients' reach.
- Conducted statistical analyses on clients' data, leading to enhanced task performance.
- Utilized web scraping techniques in Python to generate leads from legal websites, contributing to clients' business growth.

Data Analyst Intern
September, 2022 – July,2023
Accenture, Virtual
- Conducted comprehensive data analyses on large datasets, extracting valuable insights for strategic decision making.
- Leveraged Excel's Power Query and Power Pivot for data cleaning, transformation, modeling, manipulation, and visualization, ensuring accuracy and reliability in analytical projects.
- Presented findings during team meetings, facilitating communication and knowledge sharing across departments.

PROJECTS

WeRateDogs Data Wrangling and Analysis
- Used Python to gathered data from 3 sources including **Twitter API** and images.
- Wrote efficient and well-documented codes that cleaned all 3 datasets and combined them for analysis.
- Visualized and communicated results of findings using **Matplotlib and Seaborn**.

The Pizza Place Sales Analysis using PowerBI
- Used **Power Query** to assess and clean 4 datasets.
- Created date table, explicit measures and calculated columns using **DAX**.
- Built a single-paged report that utilizes **drill-downs, bookmark buttons, tooltip and filters**.
